EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Macdonald on 4/2/2009.

The application has been amended as follows:

Please replace all claims with the After Final Amendments submitted 3/19/2009 with one correction indicated below.

Claim 1 line 17, "configuration" should be replaced with "environment state".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: All pending claims 1, 4, 5, 7, 9-16, and 18-20 have been carefully considered. The present invention is directed towards methods for processing change of state in a responsive environment and methods for processing a response notification in a responsive environment.

Independent claim 1 recites “creating a new notification”, “then providing the new notification to a notification manager, wherein the notification manager is configured to receive a plurality of new notifications for a user received over time and to receive at least one response to the plurality of the new notifications from the user at the convenience of the user”, “then continuing processing in the first configuration until the at least one user response is received from the user, wherein the at least one user response includes revised needed inputs”, and “launching an application using the revised needed inputs when the user accepts the notification”.

Independent claim 7 recites, “displaying information about the notification and application parameters to the user”, “querying the user to allow the user the opportunity to respond to accept or reject the notification from a list including a plurality of notifications received over time and continuing processing in the first environment state until the user responds, wherein the user response includes revised needed inputs”, and “launching the corresponding application using the revised needed inputs when the user accepts the notification”.

Watts et al. (US 6119186) clearly teaches a responsive environment system with delayed activation. Watts’s method for delaying the activation includes prompting the user for acceptance of a notification before updating the responsive environment. However, Watts does not mention allowing the user to update application parameters or needed inputs for an application within the notification and then launching the application with revised application parameters or revised needed inputs.

Upon a detailed search of the prior art, no references alone or in combination were discovered to teach all the limitations of independent claims 1 and 7. Therefore independent claims 1 and 7 and all dependent claims 4, 5, 9-16, and 18-20 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NICHOLAS S. ULRICH whose telephone number is (571)270-1397. The examiner can normally be reached on M-TH 9:00 - 5:00 EST.
